

Enzo Leveque

Software Engineer / Full-Stack Developer

Software engineer with a Master's degree in Software Engineering for the Internet, with 2.5 years of experience at Worldline on a mission-critical securities trading application, now a consultant at Aubay. Expert in the Java / Spring Boot ecosystem, specialised in designing robust architectures (microservices, asynchronous messaging with Kafka / ActiveMQ / RabbitMQ) and DevOps automation (CI/CD, Docker). Autonomous and rigorous, comfortable from business need to production release.

Professional experience

Aubay – La Défense

Software Engineer (consultant) | June 2026 – present

- Onboarding at Aubay and fast ramp-up on the technologies and practices used in a client environment.
- Design and development of an inventory web application with a microservices architecture (Java, Spring Boot and Angular) for Restos du Coeur.
- Set up the project's Docker environment and supported the team on GitLab issues.

Worldline – Seclin

Full-Stack Developer | Sept 2023 – Sept 2025

Context: securities trading application used by major financial-sector clients, in a critical environment where reliability and performance are essential, using Agile (Scrum).

- **Analysis and design:** technical and functional impact analyses before each change to the trading modules; detailed technical specifications written from the Product Owner's needs.
- **Backend and API:** development and maintenance of the Java backend (Spring Boot, JEE, Hibernate); design of high-performance REST APIs; persistence and SQL queries.
- **Asynchronous messaging:** integration and operation of complex asynchronous data flows with ActiveMQ, within a messaging architecture (Kafka, RabbitMQ).
- **DevOps:** software lifecycle automation with GitLab CI; Docker containerisation; deployment on Tomcat.
- **Quality:** code reviews, unit tests and CI/CD pipelines to secure every delivery.

Worldline – Seclin

Back-End Developer | March 2023 – August 2023

- Implemented backend features in an industrial environment (Java, Spring, Hibernate).
- Worked with and optimised SQL databases.
- Learned quality standards: code reviews, unit tests and CI/CD pipelines.

Personal project

Oltre – full-stack application

Ongoing

Daily-life management application designed and built independently to build skills.

- **Backend:** Java 21 / Spring Boot, ongoing rework towards a microservices architecture; Spring Security and JWT authentication; MySQL 8.4 on Docker Compose with Flyway migrations.
- **Frontend:** Angular (signals, standalone components).
- **Features:** meal planner (USDA API), appointments and calendar summary, reminders, monthly budget tracking, Strava integration (OAuth).
- **Quality:** GitHub Actions CI/CD pipeline with Vitest tests.

Additional experience

Université d'Artois

Student job, teaching tutor for first-year undergraduates | 2023 – 2025

Supported students on the basics of algorithms and programming.

Centre Hospitalier de Beuvry

Student job, emergency-department stretcher bearer | 2020 – 2023

Developed a sense of responsibility, stress management and multidisciplinary teamwork.

Technical skills

- **Backend:** Java, Spring Boot, J2EE, Hibernate, Quarkus, Node.js.
- **Frontend:** JavaScript, React, Angular, TypeScript, HTML5, CSS3, Kotlin.
- **DevOps & CI/CD:** Docker, GitLab CI, Jenkins, Liquibase, Tomcat.
- **Databases:** PostgreSQL, MySQL, MongoDB.
- **Tools & Quality:** Git, Maven, Gradle, JUnit (unit testing).
- **Methodologies:** Agile, Scrum.
- **Messaging:** Kafka, ActiveMQ, RabbitMQ.
- **AI:** Claude, Copilot.

Education

Université d'Artois – Lens

Master's in Software Engineering for the Internet | September 2023 – September 2025

Université d'Artois – Lens

Bachelor's in Computer Science | September 2020 – September 2023
